MY CHECK ENGINE LIGHT WAS ON, SO MY MECHANIC REMOVED THE BULB

ARE YOU 'CORRECTING CAUSE' OR 'TREATING EFFECTS'?

If you are having a health challenge or crisis, there are 2 ways to "feel" better:

1. By masking normal function
2. By restoring normal function

Imagine your check engine light comes on in your car and I am your mechanic. If I just *'treat the symptom'* by removing the bulb, you wouldn't think I was a very good mechanic... You see, the check engine light is the *effect*, *not* the cause of the problem.

OK. So you understand that...

Now let's talk about you and your health. Imagine you feel pain and symptoms and you go to the doctor. He gives you a pill or a shot that dulls the symptom (masks normal function). Did he *correct cause*? Or did he *treat* your symptom? Did he just remove the light bulb from your dashboard?

Was this doing you a service? Or a dis-service? Did you get to the root of the cause?

Many of us measure our Health with how we "feel". We think "Everything must be fine because I feel fine. I have No Symptoms." Or... if we are having symptoms our main objective is to eradicate the symptoms as quickly as possible so we might *feel* better... like taking a pill or a shot that dulls the symptom.

LAKELAND
CHIROPRACTIC

220 South Business Park Drive • Unit A-4
Oostburg, WI 53070 • Phone 920.564.6061
www.lakelandchiro.net

A symptom is not the enemy. A symptom is your friend. A symptom is there for a reason, it is not a mistake. It is there to tell you something is going on in your body. A symptom is the EFFECT of dysfunction in your body. It is not the CAUSE of dysfunction.

Imagine your child has a fever. Ask yourself: "Why did the body raise its temperature?" Obviously because it is fighting something off that cannot survive at the increased temperature. Now you decide to treat the symptom (fever) by giving your child pills. The temperature goes down...

Was this doing your child a service? Or a dis-service? Did you get to the root of the cause?

Our Objective in Chiropractic is to determine if there is interference to the normal expression of health and life in your body. If so, we correct the CAUSE of the interference, not TREAT your symptoms (EFFECT); in essence, we *restore normal function*.

Who do you know that is living with lowered health potential?
