Volume IV • Number II

LIFE HEALS. NOT DOCTORS...

Imagine a Perfectly Healthy individual. Every part of him is functioning normally. Now... let's put him on some prescriptions. Let's give him daily doses of 'high blood pressure pills,' 'cholesterol pills,' a 'daily baby aspirin,' and a daily hit off the 'asthma inhaler.'

What is this person's health picture going to look like in 3 months? Not Good, right? Not a very pretty picture at all. All those chemicals in the body will *undoubtedly* start *making him sick*—from the inside out. If you don't think so, just read up on the latest stats on how our nation's health is plummeting; yet, the number of prescriptions filled goes up every year. The USA consumes *half* of all prescriptions in the entire world!

So... Can these same pills restore health in a person who is sick? With high blood pressure? High cholesterol? Asthma? (and can someone Please tell me what the daily baby aspirin thing is all about?!)

**HEALTH ONLY COMES FROM WITHIN OUT—
NEVER FROM THE OUTSIDE IN.**

We have developed a very peculiar paradigm in this present day: If we get sick or have symptoms, we go to the doctor, the doctor gives us a pill or a shot and that somehow *heals* us...

How many times have you cut yourself in your lifetime? What did you do for it? You cleaned the wound, maybe put a little antiseptic on it, and then covered it with a bandage. In a week or two everything is completely *healed up*. Quite Miraculous if you stop and think about it. But since this is so common, we barely pay it any mind.

Did the bandage or antiseptic *heal* you? If you think it did, go to butcher, buy a nice steak, cut it, bandage it, and put all of the antiseptic you want on it, it will *never heal*... Why not? Obviously because it is not

living! You need LIFE in order to Heal. Life animates the living body and provides all the coordination of every cell in every part of the body.

Please do not get me wrong: There is a place for drug therapy and the practice of medicine in many ways is a modern miracle. Just don't forget the basics of health. **Don't forget The Miracle of Life that resides within you.** Chiropractic care is *not* about 'treating your symptoms'. It is about Normal Flow of LIFE over your nervous system and Normal Expression of Health in every cell.

Is your Normal Flow being interfered with? Your child's? Look into Chiropractic to Restore and Maintain your family's health...Naturally.
